

# Sidheshwar Marepalle

Graduate Engineer Trainee | Software Developer

✉ sidheshwarkmarepalle7@gmail.com ☎ 9096516129 🌐 LinkedIn 📄 GitHub 📁 Portfolio

## SUMMARY

B.Tech graduate with hands-on **software development** experience through an **industry internship**. Worked on enterprise security management and real-estate CRM applications, developing **backend functionality**, **REST APIs**, and database solutions using **Java**, **Spring**, and **MySQL**. Strong foundation in **OOP**, **Data Structures**, **Algorithms**, **SQL**, and problem-solving, with experience in debugging, API testing, and team collaboration. Adaptable and willing to learn new programming languages, technologies, and business processes as required.

## TECHNICAL SKILLS

**Programming:** Java | SQL | JavaScript

**Computer Science Fundamentals:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Java Collections, Exception Handling, Multithreading, Problem Solving

**Software Development:** Backend Development, RESTful APIs, Client-Server Architecture, SDLC, Debugging, API Development

**Frameworks & Technologies:** Spring Boot, Spring MVC, JSP, Spring Data JPA, Hibernate, JDBC

**Database:** MySQL, RDBMS, SQL, Database Design, Stored Procedures, CRUD Operations

**Tools:** Git, GitHub, Maven, Postman, Eclipse, VisualVM

**Frontend:** HTML, CSS, JavaScript, JSP

**AI-Assisted Development:** GitHub Copilot, ChatGPT, AI-Assisted Code Generation, Debugging, Technical Research

## EDUCATION

**Bachelor of Technology (B.Tech 2025)**, Electronics and Telecommunication   
Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded | **CGPA:** 7.01

## INTERNSHIP EXPERIENCE

**Software Development Intern**, Prudent Tech IT Solutions, Navi Mumbai | (March 2026 – June 2026)

- Contributed to the development of enterprise Security Management and Real Estate CRM applications using **Java**, **Spring Boot**, **Spring MVC**, **JSP**, and **MySQL**.
- Developed **RESTful APIs** for document upload, retrieval, download, and management in the Guard Master application.
- Worked on **backend services** for the Post-Sales module of a Spring Boot-based real-estate CRM supporting customer, project, and sales operations.
- Created **database tables** and **stored procedures** to support complex data retrieval, dashboard reporting, and business requirements.
- Applied **Spring Data JPA** and **Hibernate** for database operations and data persistence.
- Tested APIs using Postman and **resolved backend issues** through debugging, request-response validation, and root-cause analysis.
- Collaborated with developers to understand requirements, troubleshoot issues, and deliver assigned development tasks.
- Used **GitHub Copilot** and **ChatGPT** for code generation, debugging, API development, and technical research.

## PROJECTS

**BuildPro – CRM Solution for Real Estate Business** 

- Contributed to **backend development** of a CRM platform that helps real-estate businesses manage customers, projects, sales, and post-sales operations.
- Developed **RESTful APIs** for dashboard data retrieval and backend business processes using **Spring Boot**.
- Created **database tables** and relationships to support application requirements.
- Wrote **stored procedures** for complex data fetching and reporting.
- Used **Spring Data JPA** and **Hibernate** for database persistence and relational data operations.
- Tested APIs and investigated backend issues through debugging and functional validation.

**Guard Master – Security Management Application** 

- Developed the **Document Management** feature for uploading, retrieving, viewing, downloading, and managing documents.
- Built backend functionality using **Java** and **Spring MVC**, integrating document-processing workflows with **MySQL**.
- Created **JSP-based interfaces** for client-specific document views and general document management screens.
- Connected **backend functionality** with JSP pages to support complete document management workflows.
- Assisted with **testing** and **debugging** to maintain reliable application functionality

## CERTIFICATIONS

- Software Engineering Job Simulation - Forage (2026) 
- Object-Oriented Programming - Infosys Springboard (2025)
