

Sidheshwar Marepalle

Software Engineer | Java Developer

✉ sidheshwarkmarepalle@gmail.com ☎ 9096516129  LinkedIn  GitHub  Portfolio

SUMMARY

Software Engineer with hands-on experience developing enterprise applications using Java, Spring Boot, Spring MVC, REST APIs, Hibernate, and MySQL. Contributed to Security Management and Real Estate ERP products through backend development, database integration, API testing, debugging, and AI-assisted software development using GitHub Copilot and ChatGPT.

TECHNICAL SKILLS

- **Programming:** Java | SQL | Javascript
- **Backend Development:** Spring Boot | Spring MVC | REST APIs | JDBC | Spring Data JPA | Hibernate
- **Testing & Debugging:** Postman | VisualVM | API Testing | Debugging | Exception Handling
- **Database:** MySQL (RDBMS) | Database Design | Stored Procedures
- **AI-Assisted Development:** GitHub Copilot | ChatGPT | AI-assisted Debugging & Code Generation
- **Concepts:** OOP | Java Collections | SDLC | Debugging | API Development

EDUCATION

Bachelor of Technology (B.Tech 2025), Electronics and Telecommunication 
Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded | **CGPA:** 7.01

INTERNSHIP EXPERIENCE

Java Developer Intern, Prudent Tech IT Solutions, Navi Mumbai | (March 2026 – June 2026)

- Contributed to 2 enterprise applications: a Security Management Platform and a Real Estate ERP solution.
- Developed backend modules and RESTful APIs for document upload, retrieval, download, and management workflows.
- Built business functionalities for the Guard Master module using Java, Spring MVC, JSP, and MySQL.
- Developed backend services for the Post-Sales module of a Real Estate CRM application using Spring Boot.
- Applied Spring Data JPA, Hibernate, MySQL, and stored procedures for database operations and reporting requirements.
- Performed API validation using Postman and resolved backend issues through debugging and root-cause analysis.
- Collaborated with developers to deliver maintainable and production-ready features.
- Contributed to faster feature delivery through code generation, debugging, technical research, and development automation.

PROJECTS

BuildPro – ERP Platform for Real Estate Management (Java | Spring Boot | REST APIs | JPA | MySQL) , (50 Hours)

- Contributed to the Post-Sales module of an ERP platform used to manage real estate projects, customers, and business operations.
- Developed **RESTful APIs** for dashboard data retrieval and backend business processes using Spring Boot.
- Created database tables, relationships, and stored procedures to support reporting and operational requirements.
- Utilized **Spring Data JPA** and Hibernate for efficient data persistence and data management.
- Assisted in backend debugging, testing, and API validation to maintain application reliability.
- **Impact:** Enabled centralized post-sales tracking, improved reporting capabilities, and supported efficient business operations.

Guard Master – Security Management Application (Java | Spring MVC | JSP | MySQL) [🔗](#), (45 Hours)

- Developed the Document Management module enabling users to upload, store, retrieve, and manage documents securely.
- Built backend functionalities for document processing and integrated them with JSP-based user interfaces.
- Developed client-specific and general-purpose document viewing screens based on business requirements.
- Assisted in testing and debugging to ensure reliable document handling workflows.
- Impact: Improved document accessibility, streamlined record management, and reduced manual administrative effort.

CERTIFICATIONS

- Software Engineering Job Simulation - Forage (2026) [🔗](#)
- Object-Oriented Programming - Infosys Springboard (2025) [🔗](#)
